WORK EXPERIENCE

Digital Configuration Specialist

Opus Agency | Beaverton, OR | 2026 to Current | Full Time, Remote

- Partner with global enterprise clients to configure and deliver large-scale event technology solutions for in-person, hybrid, and virtual events.
- Configure and customize enterprise event management platforms, primarily RainFocus, supporting global conferences, roadshows, and hybrid events.
- Build and maintain event websites, registration experiences, attendee journeys, forms, registration workflows, and digital event experiences.
- Configure platform functionality using HTML, CSS, JavaScript, responsive design, and CMS configuration best practices.

- Collaborate with solutions architects, project managers, designers, and client stakeholders to deliver seamless event experiences.
- Support integrations between registration platforms and external systems using APIs, webhooks, and data workflows.
- Perform quality assurance testing, troubleshoot technical issues, and ensure production readiness before event launch.
- Translate technical concepts into clear communication for non-technical stakeholders while working across cross functional teams.
- Deliver innovative digital experiences for global brands including Microsoft, Salesforce, Google, Amazon, and other enterprise clients.

Web Technology Consultant

Marathon Consulting | Virginia Beach, VA | 2023 to 2025 | Full Time, Remote

- Developed custom WordPress websites and WooCommerce solutions for marketing and ecommerce platforms.
- Built and maintained a large scale WordPress multisite environment supporting multiple brands and lead generation funnels.
- Created custom Gutenberg blocks and reusable WordPress components to improve content editing workflows and visual consistency.
- Implemented custom themes, child themes, and custom post types aligned with brand and marketing requirements.
- Integrated third party APIs and marketing tools to support lead tracking and customer engagement.
- Optimized website performance using caching, CDN configuration, and image optimization to improve Core Web Vitals.
- Improved technical SEO through structured data, performance enhancements, and clean semantic markup.
- Managed plugin updates, staging QA, and production releases to support stable deployments.
- Collaborated in Agile Scrum environments including sprint planning, standups, and retrospectives.

Full Stack Web Developer

Square Orange, LLC | Atlantic Beach, NC | 2023 | Self Employed

- Built custom WordPress themes and plugins for small business and agency clients.
- Developed WooCommerce stores including product templates, checkout flows, shipping rules, taxes, and payment integrations.

- Migrated websites across hosting environments including DNS, SSL, and database transfers.
- Managed Linux based hosting environments with performance monitoring, backups, and security updates.
- Resolved plugin conflicts, PHP errors, and performance issues to deliver stable releases with minimal downtime.
- Provided client training, project documentation, and ongoing technical support.

Lead Front End Web Developer

Hobie Cat Company | Oceanside, CA | 2017 to 2023 | Full Time, Hybrid

- Developed responsive front end templates for Django and WordPress websites.
- Translated design files into HTML, CSS, SCSS, and JavaScript with strong focus on responsive implementation, performance, and accessibility.
- Built custom WordPress templates and theme enhancements aligned with brand and marketing requirements.
- Improved page speed and SEO through image optimization, caching strategies, and CSS and JavaScript refinement.
- Created responsive HTML email templates for internal and external marketing systems.
- Collaborated with marketing and design teams on digital campaigns and website improvements.

Full Stack Web Developer

Square Orange, LLC | Temecula, CA | 2013 to 2017 | Self Employed

- Developed custom websites and web applications using PHP, Python, HTML, CSS, SCSS, JavaScript, and MySQL.
- Built and maintained WordPress websites including custom themes and plugin development.
- Delivered WooCommerce implementations with custom product layouts and checkout experiences.
- Configured hosting, CDN, DNS, and SSL settings for performance and reliability.
- Maintained Linux servers and implemented backup, update, and security practices.

Lead Front End Web Developer

Business.com | Carlsbad, CA | 2010 to 2013 | Full Time, On Site

- Developed front end template code for ExpressionEngine and WordPress websites.
- Translated Photoshop designs into responsive HTML, CSS, SCSS, and JavaScript for production use.

- Produced reusable template components and style guides to standardize page builds.
- Improved page performance and SEO readiness through front end optimization and semantic markup.
- Created responsive HTML email templates for marketing systems and campaigns.

Director of Technology

La Touraine Inc. | San Diego, CA | 2007 to 2010 | Full Time, On Site

- Led a team of web developers and IT technicians across website and infrastructure initiatives.
- Defined web infrastructure standards including hosting, security, and backup policies.
- Oversaw website maintenance, content updates, vendor relationships, and technical rollouts.
- Managed department staffing, training, documentation, and annual technology budgets.

Earlier Experience

Netegriti, LLC | WHFR Radio | Ford Motor Co. | Blue Cross Blue Shield of Michigan | 1998 to 2007

- Held web, systems, and IT support roles spanning ecommerce website management, Linux administration, Windows support, and internal technical support.
- Built and maintained websites, managed servers, supported end users, and handled day to day infrastructure troubleshooting.
